1 IDENTIFYING THE METHODS

This meeting gathered about 65 people and it was more formal than previous meetings. The organizer presented the agenda and the details of the meeting - there was going to be a discussion alternating between men and women. The people who hadn't spoken much were given priority.

The agenda went as follows:
1. Opening of the meeting
2. Presentation of the secretary and moderator
3. Presentation of the document followed by a vote: general and specific goals
4. Discussion of possible projects (methods to achieve goals)
5. Vote on the project
6. Varia
7. Closing of the meeting

To make everything easier, the goals were distributed to each participant as well as being called out one by one and displayed on the PowerPoint presentation.
After talking about the projects and possible methods already discussed, as well as possible new ideas, the group voted by a show of hands. The majority of people agreed on many points. Furthermore, some decisions were unanimous. Participants decided to change the open space into an open, multifunctional park.

2 IDENTIFYING THE METHODS

The park would include:

- Compost bins
- Accessible gardening spaces open to all (edible plants to share)
- Flowers and trees
- Permanent, open space training features
- A "little free French library"
- Panels describing Acadian and Francophone history and the culture of the region
- Installing and revitalizing benches
- Revitalizing the trail
- Installing of a few skateboarding features and concrete work
- Artistic embellishments (skateboarding features, compost bins, trash cans, benches, etc.) inspired by the Acadian and Francophone culture, made by local artists
- Choosing a name for the park that pays tribute to Acadian and Francophone culture

Other people showed interest in joining the park committee. The student group and the park committee met the following week to identify the necessary resources for the project's implementation. Meanwhile, many people showed their interest, resources and talents to the student group as well as directly on the project's Facebook page, where you could find daily updates about the project's development.
